Finding an edge for your business is far from easy. Progress is often of the one-small-step variety, rather than the giant leap that companies need to put some distance between themselves and the competition. It’s enough to make you wonder—is settling for less becoming the new normal?

Not at Infor. With Infor 10x, the latest release of Infor’s proven business applications, you can forget just getting by and start getting ahead. From ERP and CRM to financials, supply chain, human capital management, and enterprise asset management, you’ll find a comprehensive range of solutions backed by decades of practical application and continually enhanced with the latest innovations.

Think flexible and collaborative. Think beautiful, scalable, integrated, mobile. Then start imagining all the things that Infor 10x will allow you to accomplish.

Solve old problems in new ways

The methods we use to communicate are imperfect. Disconnected from key systems and processes, technologies from email to SharePoint® are designed for information sharing but too often become information vacuums instead. Handoffs don’t happen; key facts are lost; and connections, opportunities, and risks aren’t realized.

Capture vital corporate knowledge and transform the way you work with Infor Ming.le, a comprehensive platform for social collaboration, business process improvement, and contextual analytics. Incorporating the most innovative social media concepts into a business environment, Infor Ming.le marries communications and business processes to help you work smarter and faster. From collaborating alongside core systems like ERP or financials to “following” people and objects, you’ll solve problems and get work done in ways you never thought possible.

What’s the difference between social media and social business?

We have come to take for granted the technology in our personal lives. It’s fun to use, intuitive, even life-changing. Why can’t these same principles apply to business software? At Infor, we believe they can and should.

With Infor 10x, you get business software that is beautiful, familiar, easy to use, and in line with employee expectations—an increasingly important component for attracting and retaining talent. Designed by the top NY designers from Infor’s own in-house creative agency, our consumer-driven user interface gives you a seamless experience across all of your systems. You’ll reduce training time, increase productivity, and have employees who log in and say: “At last.”

Make sure out of office doesn’t mean out of touch

Being tied to a desk or even a laptop has become incompatible with the way we live and work today. You no longer sit by the phone waiting for that important call. Why should you have to be at a desk to get your work done?

Get access to both information and systems anytime, anywhere with Infor’s extensive and growing range of mobility solutions. Designed to give you secure access to core organizational systems like ERP or supply chain anytime from anywhere, Infor’s mobile applications let you monitor your business, perform key tasks, and, in short, keep things moving using the mobile device of your choice. You can also easily develop custom mobile apps and deliver capabilities unique to mobile technology—such as showing all customers within a given radius of a location—that create new ways of thinking, working, and getting things done.

Choosing the right road to mobile enablement.

Most companies have extraordinarily complex technology landscapes. Built over time to accommodate a wide range of needs (many of which have changed), organizational systems too often sit in silos, unable to talk to each other. The result is pockets of information, unnecessary rework, preventable errors, and, ultimately, severe limitations on the value delivered from your technology investments.

Get systems without borders with the innovative Infor ION integration platform. This purpose-built middleware solution lets you integrate both Infor and non-Infor applications with minimal effort, while also minimizing the disruption and complexity of upgrades. You can scale up or down to support your business as it changes, meeting any level of requirement for transaction volume or system up-time. The result can be summed up in one word—harmony.

What's makes the Infor ION technology platform tick?

Get software that talks back

With Infor 10x, software is no longer a one-way street. You get systems that talk back, automatically delivering personalized information to your desktop or mobile device, and monitoring critical processes so you can be notified of potential problems anytime, anywhere. With Infor’s sophisticated but user-friendly range of analytics and business intelligence solutions, you get robust reporting capabilities, analytics pre-built to meet specific industry needs, personalized dashboards, and workflows and alerts that can all be accessed from your mobile device, with changes synced automatically to your desktop. You can drill down into issues, analyze them on the spot, and take action, getting the information you need to keep things from getting out of control.

Minimize program coding and accelerate application development

Your business doesn’t freeze in time, so the technology that supports you shouldn’t either. Infor 10x provides technology that empowers you, rather than controlling you. You can say good-bye to rigid technology platforms that make even the most minor enhancements costly and complex.

With Infor’s innovative Mongoose application development framework, you’ll have the tools to make your systems work the way you want, building applications and creating enhancements in a fraction of the time required with traditional development approaches. No knowledge of complex source codes or programming languages required.

Meet change with confidence

A revolution has started in the world of business software. Rigid and cumbersome is giving way to agile, intelligent, and above all, fast. You no longer have to sacrifice usability and convenience for the sake of functionality. Infor 10x marries modern technologies with traditional applications to give you the best of both worlds—solutions backed by decades of practical application and continually enhanced with the latest innovations. You get software that works the way you want, adapting and changing to meet whatever new challenges or opportunities come your way.

You deserve nothing less.
