

Infor SyteLine Shop-Trak

Achieve higher quality

Top manufacturers have a new secret weapon—manufacturing execution systems (MES), because true quality management demands quality execution. Old-fashioned punch clocks and paper-based schedules simply can't keep a modern manufacturing workforce like yours operating at peak efficiency. But improving efficiency is only the first step—you need full interoperability with all business applications to truly deliver rich, real-time communications between your shop floor and the rest of your enterprise. That ensures that your sales, finance, design, management, and operations departments work with the same goals in mind at all times.

Advance to top technology

Benefit from decades of manufacturing expertise at Infor® to make your entire enterprise more productive every day. Infor SyteLine Shop-Trak enhances the comprehensive power of Infor SyteLine by adding a full suite of manufacturing execution systems to deliver better results to every corner of your business. You'll also gain from Infor 10x technology, which delivers better collaboration, integration, and intelligence. By creating a constant communication stream throughout your company, you'll be constantly positioned to take the corrective and preventive actions that lead to top quality and peak performance.

Focus on improvement

Infor SyteLine Shop-Trak automates your entire range of shop floor workforce administration and execution tasks. You'll get more done with less effort at a lower cost by adding a powerful set of features to the Infor SyteLine solution you already have.

Achieve world-class manufacturing execution and improve labor productivity with Infor SyteLine Shop-Trak.

Production Execution—Accelerate production throughout your organization using:

- Job moves and completes.
- JIT transactions.
- eKanban replenishments for internally and externally sourced parts and components.
- Rules-based, user defined labels—formatted specifically to individual customer or product requirements.
- Material Issues to production from multiple locations at once.

Production status and work dispatching—Show workers real-time dispatch information for any work center or machine, in a personalized format that every employee can easily understand.

- Real-time production schedules and priorities go directly to the shop.
- You can check production status by drilling through to transactional data.

Time and attendance, with labor collection—You'll streamline your full range of manufacturing tasks when you can:

- Achieve flawless accounting of payroll and job costing while starting or ending any number of machines at any time with Infor SyteLine Shop-Trak's simultaneous multiple machine management.

- Allow one employee to process multiple jobs on a single machine simultaneously or in rapid succession. Sophisticated cost allocations give you perfect precision and optimal productivity.
- Take advantage of Infor SyteLine Shop-Trak's support for work center teams or crews, allowing one person to reassign a dynamically sized team from one job to another.
- Automatically reconcile time and attendance, with shop floor labor, for better recordkeeping.
- Push time and attendance data directly into Infor SyteLine Payroll or ADP.

You get quality at every step of your manufacturing process with Infor SyteLine Shop-Trak. With support for your current plant entry security devices, as well as touch screen simplicity, barcode printing, and data collection device support, you'll also gain higher quality faster at less effort.

Get better results

Gain unique and powerful advantages from Infor's advanced application architecture. Our advanced Infor 10x technology powers a suite of fully interoperable solutions, including performance management, financial management, supply chain management, and others, combined in a modernized user experience to unify all the complex aspects of your manufacturing operation. Infor ION technology seamlessly connects you to non-Infor applications and gives you a path to non-disruptive upgrades to keep you at top performance permanently.
