Now available on the Infor Business Cloud.

Infor™ SyteLine already helps manufacturers worldwide improve performance and reduce costs, while web technology keeps top firms connected to the rest of the business world. Now you can combine and multiply those benefits by subscribing to SyteLine through the Infor Business Cloud. By combining the manufacturing expertise built into SyteLine and the world-class breadth and security of cloud computing technology, you get universal access to the most powerful manufacturing-specific solution available. All you need is an ordinary web browser, an Internet connection, and a subscription to cloud-based Infor SyteLine.

Proven power with total flexibility.

Infor SyteLine's proven power to streamline every aspect of your manufacturing operation draws on 25 years of refinement by Infor's manufacturing experts. You don't need to roll the dice on untested, cloud-based ERP solutions—now you can access SyteLine from any computer and any Internet connection in the world. You can move seamlessly between the on-premises and cloud-based versions at the same time, any time—or combine the two. You can also expand, relocate, and collaborate with suppliers worldwide, and respond to new opportunities at a moment's notice.

> **With Infor SyteLine, you don't have to change your business to fit the software—you can adapt and extend the software to fit your business. Infor SyteLine provides unparalleled power, with no coding, for improved workflow and better automation.**

What's more, you can still extend SyteLine to meet your specific needs, such as tailoring screens for groups or users, building your own screens, and expanding intelligent data objects (IDOs). You can even add your own tables and publish them through your IDOs, with your own screens over them, thanks to the SyteLine framework's Internet-enabled development capability. And best of all, your extensions upgrade automatically.

Maximize power and flexibility with virtually no IT involvement.

Infor Business Cloud takes advantage of advanced cloud computing technology to extend and expand the power of SyteLine to any location you want, with no involvement from your IT staff. You'll get the power of SyteLine along with a range of valuable benefits, including:

- **Reliability and assured performance.** With state-of-the-art data centers, world-class service-level agreements (SLAs), and one of the world's largest Tier 1, OC-192 backbones as your content delivery network, you get the reliable processing power and bandwidth you need to keep your business running under all conditions.

- **No hardware to buy.** When you run Infor SyteLine as an Infor cloud computing solution, Infor will host your account on data centers that are maintained and optimized by our certified experts, who know how to deliver the best performance. You can concentrate on your business and let the experts handle the technical details for you.

- **Security.** With full redundancy and world-class disaster recovery systems in place, our cloud-based offerings will survive and keep operating in any worst-case scenario. You're also protected by the latest and most powerful defenses against intrusion, hacking, and unauthorized access. SAS 70 certification ensures Sarbanes-Oxley compliance as well.

- **Unlimited.** instantaneous growth potential. When volatile business conditions press you to rapidly expand your facilities or open new locations, your business software solution can be there ahead of you with as many seats or sites as you need, anytime, anywhere. For example, if you choose to set up an office in China, you only need a laptop and an Internet connection, and you can be up and running in under an hour.

Get results quick.

Cloud-based Infor SyteLine gives you unmatched flexibility to:

- Respond quickly to changing business requirements.

- Easily personalize your ERP solution.

- Increase customer satisfaction.

- Generate better forecasts, faster.

- Deliver orders on time, every time.
