

Infor Motion Road Warrior

Don't wait to act

When you're doing business on the road, you can't be slowed down by lack of access to your back office systems. You need current information anytime, anywhere, along with the power to make decisions quickly and take action immediately while you're on the move. Infor® Motion Road Warrior brings information to where you and your customers do business—on the road, at the airport, wherever the opportunity exists.

Powered by the same Infor ION technology that connects the rest of your business solutions, Motion Road Warrior lets you get work done on the move, then helps you pick up where you left off when you get back to the office.

Smart devices need smart applications

The "smart" qualities that make mobile technologies so popular can lead to new and innovative ways of working—but only with the help of applications that are specifically built to take full advantage of mobile devices. With location awareness, voice recognition, and constant connectivity, Infor Road Warrior opens up the opportunity to act sharper and smarter—giving competitive advantage to those who strike first.

If you don't make the most of mobile technology, your competitors will. Now is the time to bring the power of mobile technology to your enterprise software to gain competitive advantage.

Work in context

Road Warrior gives today's mobile sales professional access to critical customer data in a convenient mobile form. It doesn't just give you a window on your data; it delivers sharper insight and responsiveness that rivals its desktop counterparts, including:

- **In-context business intelligence**—Road Warrior automatically zeroes in on information that's most likely to be valuable in the context of the work you're doing at any given moment, accessing graphs, charts, and critical information with the swipe of your finger.
- **Location awareness**—By taking advantage of the built-in location features of your smart device, Road Warrior maps the locations of nearby customers and other resources.
- **A view of what matters**—The Road Warrior interface displays links to popular collaboration services, such as Skype and Facetime, so that you can initiate discussions without having to launch a new application.

Road Warrior, powered by Infor Motion, gives you fast, reliable connections to all of your business applications. Also, there's no need to integrate and provision mobile apps—device and application management functions are built into the Infor ION technology framework.

Above all, Road Warrior reflects the reality of today's mobile workforce, with in-context business intelligence that helps you focus on information that's relevant to what you're doing and where you're working. For example, it's not enough to be able to view an account record—a travelling account rep needs to know about late orders, outstanding invoices, customer service issues, and a whole range of timely and relevant information that can affect a sale. Road Warrior displays all the relevant information in context to help you do business better.

Get back on the road

When you're in motion, your work should stay in motion with you. Infor Motion Road Warrior lets you get things done at more times and places than you could before. By designing native apps that harness the power of mobile technology on your tablet or smartphone, you increase your ability to work faster, smarter, and differently, giving you competitive advantage and giving your customers what they want, when they want it.

Road Warrior gives today's mobile sales professional access to critical customer data in a convenient mobile form with quick, robust capabilities that rival its desktop counterparts.
