

Infor10 ERP Business Shop-Trak (SyteLine)

Connect your systems.

Top manufacturers have a new secret weapon: manufacturing execution systems (MES), because true quality management demands quality execution. Old-fashioned punch clocks and paper-based schedules simply can't keep a modern manufacturing workforce like yours operating at peak efficiency. But improving efficiency is only the first step. You need full interoperability with all business applications to ensure that all departments work with the same goals in mind at all times.

Trust the experts.

Benefit from decades of manufacturing execution expertise at Infor™ and make your entire enterprise more productive every day. Infor10™ ERP Business Shop-Trak (SyteLine) connects the comprehensive power of ERP Business by adding the first of a full suite of manufacturing execution systems to deliver better results to every area of your business.

Automate and consolidate.

Infor10 ERP Business Shop-Trak automates your entire range of shop floor workforce administration and delivers accurate job costing and payroll data with no manual intervention through a rich feature set that includes:

Simultaneous multiple machine management —Keep an accurate accounting of payroll and job costing with Shop-Trak while starting or ending any number of machines at any time.

Achieve world-class manufacturing execution and improve labor productivity with Infor10 ERP Business Shop-Trak (SyteLine).

Multi-job capability —Allow an employee to process multiple jobs on a single machine simultaneously or in rapid succession. Sophisticated, instantaneous calculations allocate the actual time to each job for perfect precision and optimal productivity.

Team and crew support —Let one person reassign an entire team from one job to another. You can add or delete team members at any time.

Visual dispatch —Show workers' real-time dispatch information for any work center or machine, in a format resembling the traditional magnetic scheduling board, making it readily acceptable and easy for employees to read and follow.

Insightful, real-time reporting —Give managers real-time employee status information and shop floor status without leaving their desk.

Take advantage of added features.

- Time and attendance data that flows directly from Shop-Trak into ERP Business payroll or ADP
- Reconciliation of time and attendance, with shop floor labor
- Touch screen data-entry option that eliminates any need to touch a keyboard
- Barcode printing and data collection device support for speed and accuracy
- Support for your current plant entry security devices
- Support for manufacturing material issues as well as labor
- Support for modern, Lean manufacturing practices, with support for Kanban replenishment, just-in-time manufactured items, WIP transactions, and rules-based user-defined labels

Infor10 ERP Business Shop-Trak improves quality at every step of your manufacturing process. By adding our specialized shop floor document management system, Shop-Trak, you'll ensure that your workers have the latest, most accurate documentation for every task. Infor10 PLM Discrete (PLM8) also connects with ERP Business to help you create a habit of continuously improving your products and delighting your customers.

Invest in innovation.

Manufacturers gain unique and powerful advantages from Infor's advanced application architecture. Our suite of fully interoperable applications, including performance management, financial management, supply chain management, and others, combine to unify all the complex aspects of a modern manufacturing operation. Our support of open standards such as OAGIS seamlessly connects you to non-Infor applications and gives you a path to nondisruptive upgrades to keep you at top performance permanently. More timely and accurate information gives you a more productive workforce, more satisfied customers, and a more profitable organization.

About Infor.

Infor is the world's third-largest supplier of enterprise applications and services, helping more than 70,000 large and mid-size companies improve operations and drive growth across numerous industry sectors. To learn more about Infor, please visit www.infor.com.
