

Payroll - Overview Brochure

Infor CloudSuite Industrial (SyteLine) ERP Payroll

Infor CloudSuite Industrial (SyteLine) ERP Payroll* automates the process of creating and maintaining complete employee payroll records. The payroll system helps you manage employee information, direct deposits, retirement deductions, and withholdings. CloudSuite Industrial Payroll supports all federal and state taxes and rate changes, W-2 processing, electronic tax and wage garnishment remittance using ACH or EFTPS payment systems, and magnetic media tax filing. All the reports needed for processing, reviewing, and disbursing payroll are standard, including pay period details, payroll checks, check register, and quarterly and yearend reports.

Payroll is table-driven to provide flexibility in administering payroll for multiple states and to adapt to changes in federal, state, and local payroll regulations. Pay hours may be recorded manually or uploaded from CloudSuite Industrial's various options for time and attendance or shop floor time collection. Payroll calculations support regular, overtime, double time, PTO, and holiday pay.

If you choose to use a 3rd party payroll solution in lieu of CloudSuite Industrial Payroll, built-in export and import files provide the means for easily moving payroll data between the 3rd party provider and CloudSuite Industrial. Configured interfaces are standard for ADP PC/Payroll for Windows, Celergo, and Grampian, as well as a generic interface which can be configured to work with other payroll systems.

When you license the Employee Self Service module, you can give employees web access to relevant payroll and human resources tasks and information. Users can log in from the internet to review personal information, enter time-off requests, contact Human Resources, check for company announcements, and more.

**For US Companies only*
