

Arnold Machine Centralizes Information with CloudSuite Industrial (SyteLine) in Preparation for Current and Future Growth

Facts at a glance

Solution: ERP, Field Service

Products: CSI SyteLine ERP, Factory Track, Infor Service

Industry: Industrial Automation Systems

Headquarters: Tiffin, OH, USA

"The growth that AMI has had in the past several years showed redundancy in our processes. It also became apparent that we were not getting all the information that we needed without having to use several different programs. We needed one system that could give us accurate data and grow with us."

— Zach Arnold,
President, Arnold Machine

About the company

In 1994 Arnold Machine began as a two-person shop that provided companies with custom machining and fabrication services. We now operate out of a centrally-located 75,000 square-foot facility in Tiffin, Ohio that allows us to accommodate the immense growth we have experienced in the past two decades. Our first-rate facility gives us the ability to customize equipment for our local, regional and national clients. Arnold Machine offers full-service design and manufacturing services to clients who need custom automated systems integrated into their manufacturing lines. Our team of experienced engineers, manufacturers, programmers, electricians and machine tradesmen can design, build and customize virtually any type of automated equipment to your exact specifications. www.arnoldmachine.com

Challenges

- Needed one centralized source of information, an integrated system is critical to facilitate growth.
- Data must be compiled from multiple systems for reporting, significantly increasing the time to close month and quarter end.
- Heavy reliance on a few key people to answer questions and keep everyone up-to-date.
- Environment of disparate systems, duplication of data, and manual effort would soon impede growth.

Benefits

- CSI SyteLine supports highly engineered-to-order environments.
- CSI SyteLine will position the company for the present and future growth.
- Godlan's extensive experience and success with project-based companies.
- Godlan is bringing best practices to key processes.
- A consulting partner in Godlan that has scalability to meet growth demands.

"Godlan took the time to learn the needs we have as a changing, growing company. There are other ERP systems that talk a good talk but at the end of the day cannot deliver. Godlan came and learned all about how we operate on a day to day basis. They executed it so we could see how this will work for us and how the company as a whole can grow with the knowledge Infor will give us."

— Maggie Schade,
ERP Systems Coordinator, Arnold Machine
