About the company

Daniels Manufacturing Corporation is a well-known manufacturer of Connector Assembly Tooling for the Aerospace, Military and Telecom industries. Daniels’ products have been used on practically every Defense System, Aircraft Program, Land or Sea Going Transport System, and Space Exploration Program over the last six decades. Daniels offers over 8,000 standard products that may be purchased from their online store, as well as the ability to provide specialized tooling. These products include manual, battery powered, pneumatic, electric, and hydraulic tools and kits.
